# How Do I Add Several Columns At a Time In My DataGrid Table?
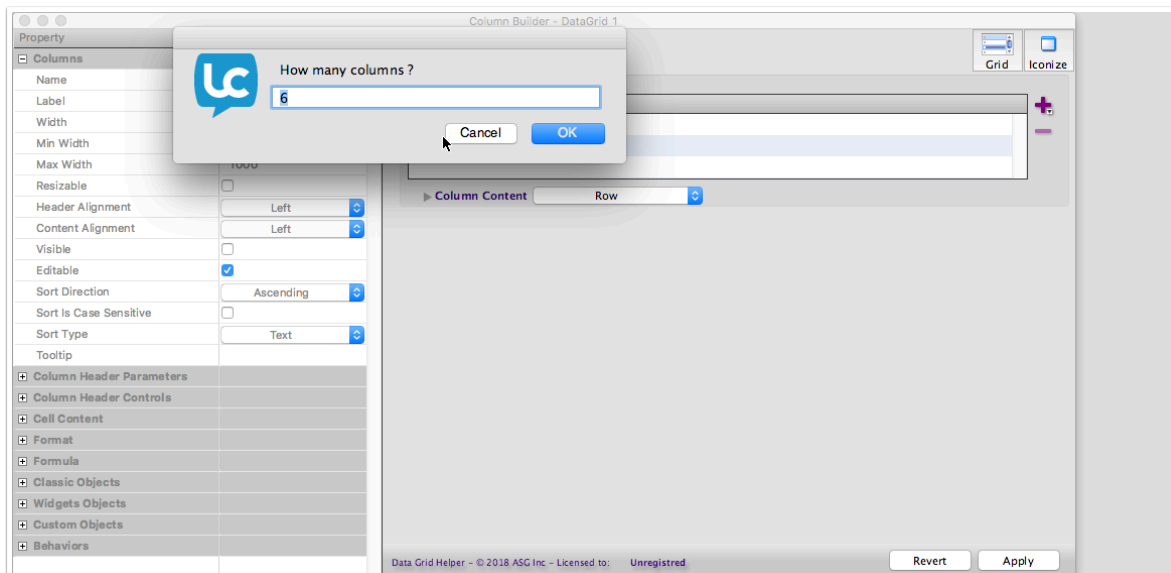

DGH 2.5 is now capable to create several columns at a time.

Holding the Left Mouse Button Pressed Onto the + Button

Hold the left mouse button pressed onto the + button. A popup menu should appear with the possibility to create 2 to 5 columns at a time.

Adding More Than 5 columns at a Time

The "Add Columns" item allows to create more than 5 columns at a time. Just input the number of columns you want in the dialog.

DGH is creating the new columns as expected.
